Optimizing Health Care Through Telemedicine
Melena Roberson BSN, RN
Clinical Informatics, Carilion Clinic

Current and Future State Projects

Problem Statement

7 Hospitals (Serving over 1 million people)

Implementation Structure

Lessons Learned

- Create telemedicine implementation checklist
- Support structure post implementation
- Redefine major milestones against process to deploy
- Set time table
- Define roles and responsibilities
- Create repeatable workflows
- Identify and engage all stakeholders
- Limited Psychiatry resources
